

Safety regulations for General Physics Labs Fall 2023

During labs, I will be wearing a face mask except maybe outdoors.

- (1) Anytime springs are used in lab, safety goggles must be worn.
- (2) Anytime boiling water is used in lab, safety goggles must be worn.
- (3) You should not look at laser light or point it towards other people.
- (4) In the event of a spill (which will be water), dispense a towel from the spill kit (aka towel dispenser) and wipe up the spill.
- (5) Food and drink are not permitted in lab.

Special for phy321: astrophotography: You are strictly forbidden to direct the telescope towards the sun, or to look at it without properly shielded eyes. I have a sun shield for the telescope but they have been known to break. During an eclipse, we may relax this with use of the solar shield for the telescope.

Attach this form to your email (as an extra attachment today) when you send in your introductory lab report. In your lab report, right below your name, you should say this:
I have read the safety regulations attached to this email.
