

Lyon College Course Syllabus Pandemic SP2022

Course: Phy251.01,02.03 SP22	Fundamentals of Physics Lab II	01,02,03: W,R,F 1-3:50
Professor: Stuart Hutton	Office: Derby 248	Office Phone: ***.307.7560
Email: stuart.hutton@lyon.edu	Office Hours: MW 10:00–10:50/AR	
Physics Email: lyonphysics@*****.***	Physics Web Gateway: physics.lyon.edu	Physics SMS: 307.***.8765

Honor Code

All graded work in this class is to be pledged in accordance with the Lyon College Honor Code. The use of a phone for any reason during the course of an exam is considered an honor code violation.

Class Attendance Policy

Students are expected to attend all class periods for the courses in which they are enrolled. They are responsible for conferring with individual professors regarding any missed assignments. Faculty members are to notify the Registrar when a student misses the equivalent of one, two, three, and four weeks of class periods in a single course. Under this policy, there is no distinction between “excused” and “unexcused” absences, except that a student may make up work missed during an excused absence. A reminder of the college’s attendance policy will be issued to the student at one week, a second reminder at two weeks, a warning at three weeks, and notification of administrative withdrawal and the assigning of an “F” grade at four weeks. Students who are administratively withdrawn from more than one course will be placed on probation or suspended.

Disabilities

Students seeking reasonable accommodations based on documented learning disabilities must contact Interim Director of Academic Support Courtney Beal in the Morrow Academic Center at (870) 307-7016 or at courtney.beal@lyon.edu.

Harassment, Discrimination, and Sexual Misconduct

Title IX and Lyon’s policy prohibit harassment, discrimination and sexual misconduct. Lyon encourages anyone experiencing harassment, discrimination or sexual misconduct to talk to Danell Hetrick, Title IX Coordinator and Interim Vice-President for Student Life and Dean of Students, or Sh’Nita Mitchell, Title IX Coordinator and Associate Dean of Students, about what happened so they can get the support they need and Lyon can respond appropriately. Lyon is legally obligated to respond to reports of sexual misconduct, and therefore we cannot guarantee the confidentiality of a report, unless made to a confidential resource (Chaplain, Counselor, or Nurse). As a faculty member, I am required to report possible Title IX violations and must provide our Title IX coordinator with all relevant details. I cannot, therefore, guarantee confidentiality.

Withdrawal Deadlines

Last day to drop with no record of the course is **Tuesday January 25, 2022.**

Last day to drop with a W is **Wednesday March 9, 2022.**

College-Wide COVID-19 Policies for Spring, 2022

Masks are mandated when indoors in all campus buildings, including academic buildings, Edwards Commons, Becknell Gymnasium and residence halls. Refer to the full campus policy online for more details. Participation in community surveillance testing is mandatory. Vaccines are STRONGLY encouraged for all faculty, staff, and students. Vaccines are NOT MANDATED for Lyon College community members.

Lyon Covid safety guidelines

The following COVID safety guidelines are provided for members of the Lyon community:

- 1. All persons must wear a mask that covers both the mouth and nose when on campus.***
- 2. Social distancing is required on Lyon College's campus.***

More details are provided on the Lyon College COVID-19 web page [LINKED HERE](#).

Class Specific Guidelines

In labs:

Social distance must be maintained even with PPE.

Students must use Saran Wrap on computer keyboards and mouse bags over the mice. Also this should cover equipment where appropriate. If you use gloves this is not then required.

Student lab and work areas must be cleaned and sanitized before and after use. Do Not leave the protective wrap behind. Throw it away. Appropriate masks must be worn that cover the nose and mouth.

In Class:

Social distance must be maintained even with PPE.

Appropriate masks must be worn that cover the nose and mouth.

Contravention of these guidelines will result in immediate dismissal from lab or class.

College-Wide COVID-19 Policies for Spring, 2022

Masks are mandated when indoors in all campus buildings, including academic buildings, Edwards Commons, Becknell Gymnasium and residence halls. Refer to the full campus policy online for more details. Participation in community surveillance testing is mandatory. Vaccines are STRONGLY encouraged for all faculty, staff, and students. Vaccines are NOT MANDATED for Lyon College community members.

Safety regulations for General Physics Labs FA2021

- (1) Anytime springs are used in lab, safety goggles must be worn.
- (2) Anytime boiling water is used in lab, safety goggles must be worn.
- (3) You should not look at laser light or point it towards other people.
- (4) In the event of a spill (which will be water), dispense a towel from the spill kit (aka towel dispenser) and wipe up the spill.
- (5) Food and drink are not permitted in lab.
- (6) In accord with the Lyon mask requirement, you must wear an appropriate mask at all times in the lab. Cover your keyboard with the wrap provided, use your mouse with cover provided. At the end of the lab period, remove and discard these coverings.

Attach this form to your email (as an extra attachment today) when you send in your introductory lab report. In your lab report, right below your name, you should say this:
I have read the safety regulations attached to this email.

**Tentative Syllabus for Physics Lab 251: Spring 2022 Pandemic
Professor: Dr. Stuart Hutton**

**Office: Derby Center: 248 Research Lab: Derby 219: General Physics lab: 148
SMS: 307.***.8765 /lab email: lyonphysics@lyon.edu web: physics.lyon.edu
Phone: ***.307.7560 Email: stuart.hutton@lyon.edu**

During class periods, cell phones are to be switched off.

Grading

As a general guide to grades, grades will be assigned as follows:

100-90] A	(90-80] B	(80-70] C	(70-60] D	<(60 F
----------------------------	----------------------------	----------------------------	----------------------------	----------------------------

There are about 10 labs this semester and each lab provides (10) points in your final grade. The particular grade in each individual lab is awarded as follows: 70% of the grade is awarded for successful completion of the lab awarded contingent upon submission of an acceptable lab report. The other 30% is awarded for submission of an acceptable report following the guidelines and rubric on the lab website. Note, however, that in the event that an acceptable lab report is not submitted, the lab is considered to not have been done and the final course grade will be lowered by 1 letter grade per uncompleted lab. Each student is to submit an individual and independent lab report for each experiment completed in order to obtain credit with each student submitting an electronic lab report. You will have the opportunity during lab to respond to comments from the received electronic labs and then revise and resubmit your reports. Refer to Student Learning Outcomes for a discussion of minimal course outcome expectations. For in class problem sessions, 10 points is awarded for successful completion.

Note: If you miss one of the labs when experiments are done and it is not made up, your lab grade will be lowered by one letter grade for each missed lab which is not made up. The full lab, including writeup, must be completed or your grade will be reduced by one letter grade for each lab not fully completed. You must make up any excused absences at the first opportunity.

A portion of your lab grade from any particular experiment may come from oral answers to questions when you turn in your lab report or lab quizzes. Thus, it is important that you understand what you did during the lab before turning the lab report in to your professor. Your work on lab write-ups will be graded for correctness, clarity and completeness. **Failure to supply details leading to a result will result in very little credit for a lab.** If you want full credit for a lab, **you must** supply the logical steps that led to the result and the result **must include proper units.** You should supply sample calculations where appropriate. Diagrams and graphs should be included where appropriate. Aside from data tables and graphs, the components required for the proper lab write-up should take about 2 - 3 pages maximum for any given lab. Be sure that each lab starts with a cover page as indicated in the lab write-up guidelines. Make sure that your lab write-up is in the form of paragraphs with correct English grammar as indicated on the lab write-up guidelines. Failure to follow the guidelines will negatively impact your grade.

Phy251 is a separate course from either Phy220 or Phy250.

The grade in Phy251 has no impact upon the grade in either Phy220 or Phy250 except as a co-requisite.

In this course, your grade will depend upon successful completion of lab experiments and reports. You are also expected to have read the lab before coming to class and viewed accompanying materials. You should bring your text, a calculator, and paper to lab. Labs will be completed and submitted after lab data collection. In order to do this, you will need to come to lab on time. You can not show up late for lab. Labs start at 13:00 for the first sub-section and 14:25 for the second sub-section of each section. Because of the requirements for social distance, it is necessary to come prepared, ready to collect data, and finish at the appropriate time. Simply said, do not come late. It is thus in your interest to show up to lab on time and do not come unprepared. Additionally, you should never plan other activities during the lab period since labs normally will occupy the entire period subsection. Your prime learning resource is the classroom: punctual and complete class attendance is expected. Absences will negatively impact your final grade. Tardiness is considered to be an unexcused absence and will negatively impact your final grade; in particular you should not expect to arrive late and be permitted to do the lab. Use of a networked device to communicate during lab, except as required to do the lab, will be considered equivalent to an unexcused absence and a zero will be recorded for the lab grade without the possibility for a makeup.

Lab report formats

If you miss a lab for an excused reason, you must make up the lab as soon as possible. If you hand in a lab report late for an unexcused reason, you will lose a minimum of 10% of your grade. Labs must be submitted in **pdf** format electronically. **When including spreadsheets in your reports, be sure to format tables so they fit on the page. I should be able to read your lab (as a single document in pdf format) without having to change anything. This means, check (proofread) your pdfs before you send them to make sure you can read them. Specifically, you must check your sent email to confirm that any attachments sent were correctly attached, could be opened, and were in pdf format.**

If you miss a lab for an excusable reason, you must make up the lab for credit as soon as the schedule permits. If you schedule a makeup lab and fail to show up for the makeup, no future makeup labs will be permitted. If you miss 3 or more labs (unexcused), you will fail the course. If you miss one or more of the labs without makeup, your lab grade will be lowered by one letter grade for each missed lab which is not made up. You are required to submit your completed lab writeup for the makeup lab within 3 days of completion. Do not submit non-pdf attachments or corrupted files via email and expect to obtain extra time to complete the lab.

Course Description

In this course you will be exposed to the experimental side of physics. Among the topics that we will investigate are electrostatics, magnetism, and optics.

Course Objectives

As a consequence of this course, you should obtain an enhanced understanding of the experimental nature of physics. In addition, you should come away from this course with an ability to interpret data in a scientifically valid manner and to have increased experience with writing brief technical reports. Refer to Student Learning Outcomes for a discussion of minimal course outcome expectations.

Course Prerequisites

In order to be taking the physics lab, you must be currently enrolled in either physics 220 or physics 250 and therefore you must satisfy the prerequisites for those courses.

Text

The text will consist of handouts in electronic format obtained via the physics gateway at: physics.lyon.edu

Notes on the lab write-up for physics labs Spring 2022 Pandemic

Your first (cover) page should include the following information:

Your Name, Date, Title of Experiment and the abstract.

(Then insert a page break)

Each lab must be the unique written effort of the student submitting the report. You may NOT reference or use lab reports (prepared by others) in your report preparation.

Lab reports must be electronically submitted to the appropriate address as a single pdf document. They must be submitted within 3 days of lab completion.

Title: Concise wording that describes the essence of the lab.

Abstract - a summary of your research including general methods and major conclusions. This is usually one paragraph long and should convince someone to read your paper. Include a statement of your hypothesis here and if data supported it.

***Introduction:** An overview of your experiment, statement of hypothesis, what you did and what the theory was behind the experiment.

Methods: - A brief discussion of experimental techniques. Diagrams are usually appropriate in this section.

Results -written usually in the past perfect tense or passive voice; describes your findings, data collected, and includes data tables, graphs, general trends, derived formulas, etc. All work and data tables must be shown here. In general, you need to have a copy of your original data with you but the data included in the lab report can be copied from your original data. Data should be absent of obvious errors (since you would have tracked down these items). **Each diagram, data table or graph must have an accompanying description of what the information shows, and what experiment it relates to.**

Discussion and analysis - tense can vary, describes your results in relation to other data, discusses problem associated with the lab, postulates trends in the data, predicts results given different circumstances, suggests sources of error, etc. Discuss how the data supports, or does not support your hypothesis and how well such support is in terms of error analysis such as percent differences. **Be sure to include sample calculations in this section.**

Sample Calculations - As directed for the particular portions. Show all units here.

Literature Cited - a list of books, articles, etc., that you used to assist you in presenting your data and which were referred to in the write-up. **When citing a reference from the internet, you MUST include the URL that points directly to the document so that a single click of the mouse will bring up that exact document. Every lab report will have at least 1 citation or the report will not be accepted.**

Your presentation of the lab is important. Be sure it is grammatically correct and neatly typed. Be careful of tense changes within a paragraph. Data collected during a lab must be authentic. "Fudging" is unacceptable and unnecessary. Lab write-ups should be as **concise** as possible within these guidelines. I am not looking for exhaustive tomes of work in a lab write-up.

Physics Lab Grading Rubric Spring 2022

Note: Each student has the opportunity to revise deficient portions of the lab report during the lab period except for teamwork, arrival and departure.

	1	0.5	0
Scientific Thought	Hypothesis in abstract and introduction. Supporting evidence (or non-supporting) discussed in conclusion.	Hypothesis in abstract and introduction but not relevant and supporting evidence (or non-supporting) not discussed in conclusion.	Hypothesis absent in abstract and introduction; Supporting evidence (or non-supporting) not discussed in conclusion
Critical thinking	Correct discussion of experiment, and how results relate to hypothesis.	Incomplete discussion of experiment and how results relate to hypothesis	poor or absent discussion of experiment, and how results relate to hypothesis.
Inquiry and Analysis	Complete discussion of experimental technique and data results	incomplete discussion of experimental technique and data results	poor or absent discussion of experimental technique and data results
Informational Literacy	Correct physical terminology contained in report. At least one reference present.	incomplete physical terminology contained in report. Reference present but not correct.	incorrect or absence of physical terminology contained in report. Reference not present.
Quantitative Literacy	Correct usage of calculations including spreadsheets	correct usage of calculations including spreadsheets but something significant missing	Absent or incorrect usage of calculations including spreadsheets
Teamwork	Successful team completion of lab		Unsuccessful team completion of lab
Arrival	on time		tardy or absent
Departure	Work space returned as it was when arriving		Workspace left in disorder upon departure
Overall report	All required elements present		Required elements missing.
Quality	experimental results presented without obvious errors		experimental results presented with obvious errors

Student Learning Outcomes for the Physics Program at Lyon College RSP2017

1. Students who complete the physics 210/220, 240/250, 241,251 sequence are able to

1a. Articulate the basic principles of physics.

1b. Apply the basic principles of physics to solve a variety of qualitative and quantitative problems at the introductory physics level.

This can be measured with portions of currently-used standard exams and exam problems.

General Education learning outcomes for Phy220/Phy250/Phy251

Critical thinking: 220,250,251

Inquiry and analysis: 251

Quantitative literacy: 220,250,251

Teamwork: 251

Scientific thought and Information literacy: 220,250,251

Portions related to Phy251 will be evaluated for **2** selected labs with rubric data recorded. Since students are allowed to submit revised reports, the initial submission will normally serve as the indicator since students are given the opportunity to revise submission based upon my comments. Portions related to 220/250 rubric will have data recorded for 4 selected problems; one from each exam.

Critical thinking is regularly evaluated in phy220, phy250 and phy251. In Phy220 and Phy250 it is evaluated in terms of starting with correct physical principles applicable to a given situation and being able to follow it through to completion. It is evaluated by use of exam problems. In Phy251, it is part of the process of scientific thought and is evidenced by use of supporting data for a hypothesis as is required by the lab rubric.

Inquiry and analysis is regularly evaluated in phy251 as part of the required element of completed lab writeups. It is evidenced by student explanation of the experiment and is a required element by the rubric.

Quantitative literacy is evidenced primarily in phy220 and phy250 by successful completion of physical problems with correct units and correct numerical operations. It is evaluated by use of exam problems. Quantitative literacy is exhibited in phy251 by students being able to follow through with calculations partially enabled by spreadsheet examples and being able to interpret the results. This is evidenced by the writeup and is a required element by the rubric.

Teamwork is regularly evaluated in phy251 and is evidenced by successful team completion of lab writeups as is required by the rubric.

Scientific thought and information literacy is regularly evaluated in phy251 and is evidenced by use of hypothesis with supporting evidence (or not supporting evidence) based upon experiment as is required by the lab rubric for 3 selected labs. Information literacy is regularly evaluated in phy251 and is evidenced by correct physical terminology in lab reports as required by the lab rubric. It is also a significant portion of phy220 and phy250 and is evidenced by student success in using the basic physical terminology enabling students to correctly initiate quantitative solutions to physical situations.
