

## Safety regulations for General Physics Labs Spring 2025

**During labs, I may be wearing a face mask except maybe outdoors.**

- (1) Anytime springs are used in lab, safety goggles must be worn.
- (2) Anytime boiling water is used in lab, safety goggles must be worn.
- (3) You should not look at laser light or point it towards other people.
- (4) In the event of a spill (which will be water), dispense a towel from the spill kit (aka towel dispenser) and wipe up the spill.
- (5) Food and drink are not permitted in lab.

Special for phy321: astrophotography: **You are strictly forbidden to direct the telescope towards the sun, or to look at it without properly shielded eyes or proper equipment. Never use the finder scope with your eye to locate the sun.** I have a sun shield for the telescope but they have been known to break. Since you will be using the telescope at night, I recommend that you coordinate your times so that observing can occur together. I do not recommend moving the telescope very far from Couch Garden but you may wish to if you need darker areas. As a special requirement, I definitely want my students to have a phone with the Lyon Security number easily dialed. If you feel something creepy while out watching stars, don't hesitate to call security.

Attach this form to your email (as an extra attachment today) and send it today. In your email, you should say this: I have read the safety regulations attached to this email.
